INTRODUCTION AND METHODOLOGY

Opinion Research Associates, Inc., interviewed by telephone 500 randomly selected registered voters in Arkansas who said they were planning to vote in the November general election. The survey was conducted in association with UCA's 2008 Presidential Election Seminar. Interviews were conducted from ORA's central telephone facility in Little Rock March 6-11, 2006. Interviews were conducted statewide and divided equally among the state's four congressional districts.

A random sample of 500 respondents has a margin of error of ± 4.5 percentage points at the 95% level of confidence. This means that 95% of all random samples of this size will produce percentages that can be expected to vary, as a result of random variation, by no more than 4.5 percentage points from the true population parameters. Percentages calculated on smaller sub-samples will have a somewhat larger margin or error depending upon the size of the sub-sample.

Occasionally percentages will not add up to 100% owing to rounding error.

MASTER QUESTIONNAIRE

2008 UCA POLITICAL POLL

Hello, my name is _____ with Opinion Research Associates, of Little Rock. We don't sell or attempt to sell anything -- we are a professional research firm. [Tonight/Today] we are conducting a brief political poll in association with the University of Central Arkansas.

S1. Are you registered to vote in Arkansas?

- 1. Yes (**CONTINUE**) 100%
- ⊖. No (**TERMINATE**)

S2. Are you planning to vote in the general election in November?

- 1. Yes, definitely (**CONTINUE**) 91%
- 2. Yes, probably (**CONTINUE**) 9%
- ⊖. Probably not, definitely not (**TERMINATE**)

To begin with I'd like to ask your impression of some people in public life. As I read each name, just tell me whether you have a very favorable opinion of that person, a somewhat favorable opinion, a somewhat unfavorable opinion, or a very unfavorable opinion. If you don't recognize a name, just say so. Here's the first one...
